

FIND A SPONSOR

Students are urged to find a sponsor to pay the registration fee.

Many service clubs, conservation groups and industry associations are interested in helping students attend a workshop. Afterwards, the student may make a presentation to the

sponsoring group, letting them know the value of their contribution.

Academic scholarships may be available for students in financial need. Check the student application form for more information.

Want More Information?

Call Steve Hale, USFS, 775-884-8112, or Chris Miller, BLM, 775-885-6148.

SUMMER JOB CONFLICT?

The two workshop sessions are scheduled for June, right after school lets out for the summer, to give teens a chance to attend the workshop before starting a summer job. Past students claim the experiences gained from the workshop are well worth the loss of a week's pay.

The High Sierra Resources Workshop is a partnership among Western Nevada Resource Conservation and Development, Nevada Natural Resource Education Council and natural resource management agencies, including the Humboldt-Toiyabe National Forest, the Natural Resources Conservation Service, the Nevada Division of Forestry and the Bureau of Land Management.

The workshop is possible because of the support and assistance of the Back Country Horsemen of Nevada.

High Sierra Resources Workshop

*Start Summer Right!
Get out of the house...
and into the wilderness!*

Eight days of fun and challenges are offered to students with the right stuff!

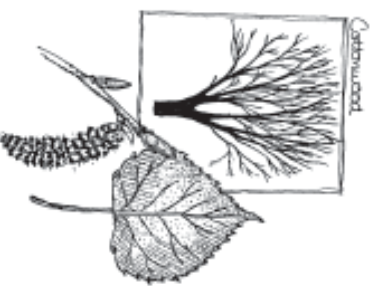

If you...

love the challenge of the outdoors,
enjoy hands-on learning, and
are interested in a career in natural
resource management,

...then you have the right stuff to follow the
Carson River up into the High Sierras.

June 15-22, 2004

Spend three and a
half days at the Silver
Saddle Ranch in
Carson City studying
the river, wildlife,
historic forest
harvesting, land
development,
wildland fire and

human impacts
such as air and
water pollution.

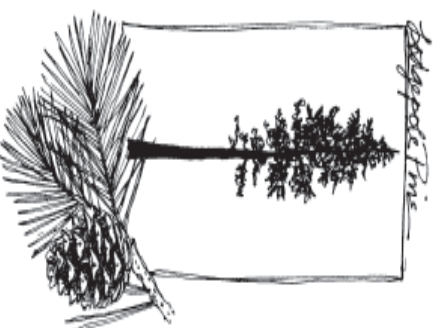

Then hike into
the Carson-

Iceberg

Wilderness to
experience first
hand how

wildlife, forests,

riparian areas, soils and plants interrelate
in an incredibly beautiful natural
wonderland.

- You'll get fabulous food and plenty of it, thanks to the pack horses carrying in most of the gear.

- You'll hike about 14 miles in back country.

- You'll be challenged to answer the questions resource professionals face every day.

- You'll white water raft the Carson River, depending on the water level.

GET AN APPLICATION!

Your science teacher has application forms. Fill it out, then get it back to your teacher. Your teacher must sign the application and return it to the workshop sponsors by **April 25**.

IF YOU ARE SELECTED

Students accepted to the workshop must submit \$100 to register for a session. That's the total cost of the workshop to you! Most of the cost of the workshop is paid through an environmental education grant, financial or in-kind sponsors, and generous contributions from individuals and organizations in your community.
